

C&A Consulting Hires Danielle Crimmins as Director of New Family Office Services Practice

NEW YORK – May 29, 2014 – Today [C&A Consulting LLC](#) announces the addition of Danielle Crimmins as the Director of the firm’s new Family Office Consulting Services practice. Ms. Crimmins adds her expertise in software deployment, back office processes and procedures, accounting and client support. Her capabilities will augment C&A’s efforts to serve the investment community and support the needs of family offices. C&A is currently engaged by a multi-billion dollar New York family office to provide onsite dedicated software support with an aim to boost efficiencies, monitor new software developments, and help ensure that the client is optimizing its technology infrastructure.

Ms. Crimmins’ prior experience includes leading multiple family office software implementations and providing client support for an asset management system. At her prior investment software firm she developed a robust understanding of the needs of family offices and was able to successfully assist clients in enhancing their business and operational efficiencies. Ms. Crimmins also successfully managed an implementation of a global inventory management software platform and participated in a Mortgage REIT’s portfolio accounting platform implementation to bring their back office accounting in house from a third party provider.

“After working with technology and family offices for many years I recognized the need to provide a stronger solution that efficiently addresses both their day to day operational needs and their technology implementations. I am thrilled to join the team at C&A and look forward to helping our family office clients by providing dedicated, knowledgeable, and unbiased support that is completely focused on their requirements today and in the future,” said Danielle Crimmins, Director of C&A Consulting.

“Given C&A’s commitment to the technology and operational sides of financial and alternative investment firms, we’re able to provide expertise on a wide range of software platforms and technologies. The addition of Danielle, and the launch of our family office services practice, will better serve our clients and enable them to focus on their core investment and family support services while having both on-going technology support and a partner familiar with their unique needs,” said Noland Cheng, Managing Partner of C&A Consulting.
